

DESIGN, DEVELOPMENT, ENGINEERING & MANUFACTURING SUPPLIER & SERVICE PROVIDER

SPM | Marking & Coding | Label Print & Apply | Track & Trace | Traverse & Winding
Measurement & Control | Inspection & Verification

PRODUCT OVERVIEW

Registered
supplier with:

About Us

— an ISO 9001:2015 TUV Nord Certified company is into Design, Development, Engineering & Manufacturing of quality products / systems / SPM Machines and providing pre & post sales support is successfully catering to a spectrum of industries, viz. Extrusion, FMCG, Pharma, Packaging, Automobile, Electrical & Electronics, Metal, Cable, Tube & Pipe, Food & Beverage, Printing, Warehousing & Logistics, Rubber & Tyre Industry, etc. The list goes on and on as we explore for new application areas at every given opportunity. In association with our partners, who are leading global players, we have been seamlessly integrating precision, reliable, cost effective and best engineered products to our valuable customers across applications and industries we operate in. This has enabled us to create a niche for ourselves in the markets we operate in, for almost two decades now.

In our effort to reach further heights to support our valuable customers, we work closely with them to understand their exact requirements to provide their targeted goal.

Aim

Pursue excellence through total quality management.

Mission

Provide superior products and services to our customers and maintain market leadership.

Vision

Evolve as an institution that serves the best interests of all stakeholders.

Social Value

Ensure the highest standards of ethics and integrity in all our actions.

Our Strength

Team  - dedicated and experienced professionals, which helps us in our business endeavors. These professionals are selected on the basis of their skills and domain expertise. They understand the value of quality and strive hard to achieve the basic objective of the company, which is "Complete Customer Satisfaction".

Our Partners

Some of the leading global players offering the best engineered products, across applications and industries, by seamlessly integrating precision, reliability and cost-effective solutions.

Product Portfolio

- SPM – Special Purpose Machines
- Marking & Coding Machines
- Label Print & Apply • Track & Trace
- Inspection & Verification
- Measurement & Control
- Traverse, Winding & Clamping
- Conveyors • Software & Data Logging
- Customised Solutions
- Pre & Post Sales Support
- Consumables • Spare Parts

Why

We are one of the foremost choices of our clients in the domain of Industrial Automation, Process Automation, Identification & Verification Systems owing to following reasons:

- Ethical business practice
- Client centric approach
- Customized solution
- Timely delivery
- Value for money
- Pan India presence
- Reliable & cost effective solutions
- MSME & NSIC Regd. Co.

Small Character Marking Machine

Jet1Neo/Jet2Neo/Jet3UP/Jet3UP Rapid- To print the variable information on the primary and secondary packaging lines up to 1/2/3/4/5 lines respectively. No clog Nozzle (Sealtronic), Automatic Viscosity & Pressure Control, Window based operating system are few of the salient features our printer offers. The superior technology has been awarded the gold medal that ensures minimum break down & low running cost owing to the fact that one-liter of ink can give up to 200 million characters in the industry.

Capabilities

- Innovative Design • Automatic Nozzle Seal (Sealtronic) • Automatic Self Diagnosis
- TFT Touch Screen • Easy Integration • Environment Friendly • Intuitive & Error Free Handling
- Lowest Consumption of consumables • 800 Standard Features • Level Monitoring for Ink & Solvent
- Wireless Connectivity • High Speed Printing - upto 1000 MPM

Specifications

* Product Length 280mm

Applications

Thermal Marking Machine

The thermal inkjet technology is maintenance-free and non-wearing and enables high resolution marking on absorbent and non-porous surfaces upto 900 x 600 dpi with variable printing heights of 12.5 to 100 mm, depending on the control system and number of connected print heads.

This is an Innovative product with high resolution and small & large format coding. All systems allow flexible combinations to address all printing requirements in the highest possible quality, swiftly, touch-free, on absorbent and non-absorbent materials.

Capabilities

- Innovative Design
- Automatic Self Diagnosis
- Marking on absorbent and non-porous surfaces
- Easy Integration
- Inbuilt Running Cost Calculator
- Lowest Consumption of Consumables

HandHeld Coder

HandHeld Coder - Mobile and battery operated coder, catering to wide range of offline applications

Specifications

<i>iJet</i>
Character Height : Upto 12.5mm
Number of lines : 6-8
Printing Speed: upto 300 mpm
High resolution marking
Numbering, 1D/2D Code

Applications

Thermal Transfer Overprinting Coder (TTO)

LMI offers Thermal Transfer Overprinting machine for continuous and intermittent printing as well as off-line printing. The intermittent machines are suitable where the web material or item to be printed stops once per machine cycle and continuous printers are for use where the substrate material or object to be printed is fed continuously when the parent machine is operating.

Versatile Thermal Transfer Printer, capable of printing quality images, including Texts, Graphics, Dates, Bar codes and 2D codes on to flexible packaging material, including labels, films, foils, cartons and cards. They are available in two print widths, 53 mm and 107 mm and can print images up to 500 mm long.

Applications

Laser Marking Machine

LmArk - *the permanent mark*

LmArk - Laser Marking Machine employing Optical Fibre technologies to mark variable data on various products & substrates with a line speed upto 80 meters per minute.

Laser Marking Machine offers permanent marking of alphanumerical characters, logos and 1/2 D Bar Codes either in static or in dynamic condition.

Both metal and non metal Laser Marking applications are possible owing to selection from wide range of Laser sources such CO₂, UV, Green Light, Fibre Laser and wattages ranging from 5W to 3000W depending upon application & substrate. The UV Marking is more precise and employs digital high speed for processing.

Capabilities

- Stable Light Source ● High Quality Spot ● Uniform Laser Density ● Uniform Laser Output ● High Speed ● Compact Size ● Stable Operation ● Data optimisation ● Easy Setup ● Simplified operation

Specifications

Applications

Label Print & Apply Machine

Our Label Print & Apply Systems are quick, reliable and trouble free for broad range of products and applications.

As an expert we know 120 ways of label application including RFID and do supply consumables also. Help us in understanding your application and get a perfect solution.

Capabilities

- Innovative Design • Self Levelling Printhead
- Automatic Self Diagnosis • Touch Screen
- Easy Handling • Realtime Printing
- Integration with Level 2 System

Specifications

Technologies	Wipe ON	Tamp ON	Tamp Blow	Blow ON
Label Speed & Product Speed	Same	Stationary	Symmetric	Symmetric
Label & Product Direction	Same	Stationary	No-Limit	No-Limit
Method	Contact	Contact	Non-Contact	Non-Contact
Speed	Upto 40m/min	Zero	High	High
Accuracy	Precision	Precision	High	Limited

- Apply labels easily on any substrate • Caters to wide range of applications • Power supply required -NIL
- Easy to operate • Easy to handle
- Technology offers label edge detector that automatically senses the leading edge of the label to ensure accurate dispensing
- Can apply even pressure-sensitive & RFID labels ranging from 20mm to 100mm widthwise

Applications

Tamper Evident Labeller

Tamper Evident Labeller to be integrated into existing data matrix station or weighing system. Self adhesive label seals are applied on both sides of the flap openings of pharmaceutical packing. Perforation on the labels will expose manipulation by destruction of the label. Depending upon the packaging plant labels are dispensed after weighing or after coding machines.

Capabilities

- Sealing Labelling for protection against counterfeits
- Two-sided corner labelling of folding boxes
- Highly compact design to allow integration into existing plant
- Output clocking upto 300 items per minute
- Stepper motor driven applicator
- Processing of transparent, perforated labels
- Speed independent labelling via tamp wipe on method
- Dual label roll unwinding

Specifications

Wrap Station : Top & Bottom	Interface Box for I/O
Direction : Right /Left Version - Please confirm	Dispensing Accuracy : +/- 0.8 mm
Minimum Label Size (w x h) : Minimum : 20 x 20 mm Maximum : 40 x 40 mm	Maximum Dispensing Speed : Upto 78 meters /minute
Maximum Label Size (w x h) : 40 x 40 mm	Power Supply : 220 VAC
Unwinder for Label roll diameter up to 300 mm	Power Consumption : 300 W
Roll Length Maximum : 450 meters	Housing : Aluminium /Stainless Steel
Core Diameter : 3"	IP Rating : 40
Low label prewarning sensor	Ambient Temperature : 10 C degree to 38 C degree
Alarm 3 Colour	

Applications

Measurement & Control

LaserScan

LaserScan diameter gauges are legendary for their consistently accurate diameter measurements, minimal maintenance and extraordinary reliability. It caters to few of the applications as under:

- Wires & Cables • Optical Fibre Cables • Medical Tube
- Tubular Glass • Plastic Tube & Pipe • Metal Tube & Pipe
- Rubber & Plastic Hoses • Rod & Bar • Strip & Ribbon • Rope & Wire
- Rope • Sleeves • Mono Filament • Pins & Gauges • Metallurgy

Capabilities

- High Accuracy
- Easy to operate
- Various I/O
- Remote display
- Feedback Control
- Alarm
- On Line/Off Line Applications
- Low ownership cost
- Fast pay back

Measurement Specifications

Model No.	LS8110	LS8130	LS8140	LS8180	LS8210	LS8220	LS8225	LS8240

Applications

Measurement & Control

FineScan

FineScan is another addition to our diameter gauge series known for its low cost and user friendly interface and has been specially designed for applications requiring OD Measurement of fine products such as:

- Wire Galvanizing & Enameling
- Monofilament
- Fly Fishing Line

Measurement Specifications

Measurement Range	0.02 to 1.00 mm
Measurement Precision	+/-0.0005 mm
Scan Rate	2000 Scans/sec.
Repeatability	+/- 0.0005 mm
Power Requirement	220 volt AC + /-5%
Ambient Temperature	Under 50°C

Capabilities

- High Accuracy
- Easy to operate
- Various I/O
- Remote display
- Alarm
- On Line/Off Line Applications
- Low ownership cost
- Fast pay back

FineScan (HH) Mobile with LCD Multi-lineDisplay

(Specifications same as above)

Applications

Measurement & Inspection

VPro - Insulation Slice Profiler

VPro — a high resolution vision based system and supported by a touch screen PC software. The customer can benefit in instantly knowing the cross-section of the insulation (slice) geometry to ascertain that produced cable is well within specifications.

VPro offers 360 degree Measurement with 1 degree resolution with Zoom in & Zoom out functionalities.

Technical Specifications

Model	VPro-10	VPro-25
Measurement range	1-10mm	5-25mm
Accuracy	0.05 μ m	0.05 μ m
Working Distance	600-800mm	800-1000mm
Working Voltage	220V	220V
Temperature	50 degree C	50 degree C

*Higher size also available on request

Capabilities

- Precise Measurement of Profile
- 360 degree Measurement with 1 degree resolution
- Measurement & Distinction of Colour Band with Analysis
- Zoom in Option
- High Accuracy
- Highest Repeatability
- Modular Design
- Reliable & Rugged
- 15" TFT Touch Screen
- Easiest Operation
- Data-logging & Report Generation
- Various I/O
- Low Ownership Cost

Applications

Measurement & Inspection

WAD Detection

WDM 2 — Wad Detection Machine employs Laser Technique to detect the presence /absence of wad inside the cap taking into account the following critical Parameters of the WAD to accept /reject the cap besides logging the data on real time basis.

These parameters are vital in the pharmaceutical/ Food industry for in-process analysis.

All the food and pharma products are meant for safe consumption of the consumer and the manufacturers desire that product remains usable till its expiration period. A Wad is a flexible pad inserted in the plastic or glass bottle cap. The wad serves the main purpose of complete and tight sealing of the cap onto its container thus preventing any spillage and long shelf-life of the product.

Wad Detection Machine- CONFIGURATION

S.No	Cap Size mm	Belt Speed MPM	No. of CPM	InterGap of Cap mm	Caps per measuring Area (400mm)		Pusher Action			Product Count
						0WAD	1WAD	2WAD		
01	Ø38	18	180	40	5	Reject	Accept	Reject	Batch wise	
02	Ø44	18	180	40	5	Reject	Accept	Reject	Batch wise	
03	Ø54	18	180	40	4	Reject	Accept	Reject	Batch wise	

Measurement & Inspection

ProfileScan

ProfileScan — Profile Measurement System employs Laser Technology to measure the following critical Parameters of the Tread besides logging the data on real time basis. These parameters are vital in the tyre industry for in process analysis.

The system comprises of a Laser Transmitter and Receiver unit mounted firmly on a Rigid C steel frame and a smooth traverse mechanism to move the product gently at steady speed while the scan is being done. Suitable guides are there so as to guide the products one-by-one in a line. A servo motor drive unit is driving the system. The ScanPro software displays all the measured images in real time basis and plotted graphically for a easy and quick analysis by the QC supervisor.

Specifications

- Thickness Measurement Range: 25 - 80 mm
- Width Measurement Range: 900 / 1500 mm
- Line Speed: Fixed
- Accuracy: 0.1%
- Resolution: 1/100 mm

Applications

- Tread Profile Measurement
- Panel and Board Measurement
- Sheet and Calendar Measurement
- Gypsum Board
- Wood Panels
- Slabs & Sheet
- Plywood

Capabilities

- Tread Thickness • Over All Width
- HUMP Width • Centre Line Gauge
- Buttrest Gauge • Buttrest Distance
- Shoulder Gauge • Tread Thickness Graph
- Tread Real Time Data Log

Measurement & Inspection

ScanLength

Scan Length is a standalone heavy duty Length measurement system. System consists of Timing belt device that can form a firm grip on the long product being measured from low to high line speed. The Bidirectional feature takes care that absolute length is measured accurately and displayed. The complete unit includes product guide rolls; digital encoder and programmable display unit, protective enclosure and sturdy height adjustable mounting stand. The display device has suitable contact output to trigger a stop, inch signal to a PLC.

Product Diameter range - 2mm upto 120 mm*.

Measurement accuracy - 0.05% of total length.

Capabilities

- Accurate Measurement of Length & Speed
- Modular Design
- Highest Reliability
- Excellent Performance
- Catering to wide Product Diameter Range
- Fast Payback
- Easiest Operation
- Bi Directional

Specifications

SL 9010	SL 9030	SL 9050	SL 9120*
Diameter Range : 2mm-10mm Speed : Upto 500mpm	Diameter Range : 5mm-30mm Speed : Upto 300mpm	Diameter Range : 5mm-50mm Speed : Upto 300mpm	Diameter Range : 10mm-120mm Speed : Upto 100mpm

Stacker/Feeder/Conveyors

LMI offers customised conveyors - both belt & roller in different configurations such as fixed or of variable speed depending upon the applications / customer specification

Technical Specifications

Model	FMC650-312	FMC-650-922
Product Range	80mm ~ 300mm	225mm ~ 550mm
Min. Product Width	80	225
Max. Product Width	300	550
Feed Rate	73 m/min	73 m/min
Product / min	180*	180*
Conveyor Speed	83 m/min	83 m/min
No. of Lines	X	X
GSM	0.15 to 4 mm	0.15 to 4 mm
Printing Area	X	X

*Product Length 280mm *** Without Printing Solutions

** Conveyor Length 2 meter (standard); customised as per Application

Track & Trace

LMI provides entry level barcode printers and scanners with software for traceability of the products and consumables such as labels and thermal foils. The label size ranging from 10mmx20mm upto 100mm x150mm

Flowpack Machine - Horizontal

LMI offers Horizontal Flow Pack machine with film loaded from the top. The product contact points are in stainless steel. Inbuilt 2 meter conveyor with nylon pushers for feeding and 1 meter conveyor for moving the sealed unit.

Capabilities

- Brushless servo motors with servo drives.
- Longitudinal sealing
- Reed holder with expanding shaft.
- Easy Operations with touch screen panel.
- Remote troubleshooting via Ethernet port.
- European design with CE confirmation

Rewinder

Implementation of Marking & Coding on laminates becomes easier with LMI Rewinder 9050, which offers automatic web aligner and side loading of roll, catering to wider range of web width. Also, this Winder is suitable for various coding technologies to mark/print variable information such as Batch Code, Date Code , Barcode, etc.

Specifications

WRM 9500	Core Diameter : 76 mm
Application : Laminate Roll Winding	Motor : AC Motor 2 HP Bonfiglioli (Italy) or equivalent
Loading : Side Loading	Gear : Bonfiglioli (Italy) or equivalent
Web Aligner/Edge Guiding System : Automatic	Drive : Variable Speed Fuji (Japan) / equivalent
Speed : Variable Up to 80 MPM	Frame : Painted MS Body
Shaft & Pulleys : Nichrome Coated	Dimension : 5'X48'X4'
Width of Roll : Adjustable from 100 to 400 mm	

Tread Marking / Laminate Marking

Industrial Tread Marking Machine employed to Mark Alphanumeric Text on the Tread for in-process identification & tracking. The marking machine can be configured employing robotic arm to mark on the laminate in rotary motion.

Applications

- Tread Marking
- Laminate Marking
- Sidewall Marking
- Sheet / Calendar Marking
- Bambury Mix Marking
- Run-out Test Spot Marking

Laminate Marking With Robotic Arm
